

FACULTY OF PHARMACY

Pharm-D(6-YDC) II-Year (Main & Backlog) Examination, December 2020

Subject : Pharmaceutical Microbiology

Time: 2 Hours

Max. Marks: 70

PART- A

Note: Answer any Six questions.

(6x5=30 Marks)

- 1 Write short notes on Koch's Postulates
- 2 Write about Rickettsiae
- 3 Explain growth phase of Bacteriophage
- 4 Write about kingdom Monera
- 5 Explain passive agglutination
- 6 Write causative organism and mode of transmission of meningitis.
- 7 Define Bacteriostatic and Bactericide
- 8 Write the principle involved in simple staining technique
- 9 Write the composition of Nutrient agar Medium.
- 10 Write about Lyophilization.

PART- B

Note: Answer any Four questions.

(4x10=40 Marks)

- 11 Write in detail about contributions of Robert Koch and Louis Pasteur in the field of Microbiology.
- 12 What is growth? Explain different phases of growth of bacteria and synchronous growth.
- 13 Explain different methods of isolation of Aerobic and Anaerobic bacteria and explain viable count method.
- 14 Explain different methods of Heat sterilization.
- 15 Explain Evaluation of disinfectants by Redial – Walker and Chick – Martin test.
- 16 Explain about Humoral and cell mediated Immunity.
- 17 Explain about western blotting and southern blotting techniques.
- 18 Explain about Microbiological assay of Penicillin according to I.P.

FACULTY OF PHARMACY

Pharm-D(6-YDC) II-Year (Main & Backlog) Examination, December 2020

Subject : Patho physiology

Time: 2 Hours

Max. Marks: 70

PART- A

Note: Answer any Six questions.

(6x5=30 Marks)

- 1 Write the deficiency symptoms of vitamin D
- 2 Discuss the mechanism involved in rejection of allograft.
- 3 Mention the abnormalities in lipoproteinaemia.
- 4 Write the symptoms in irritable bowel syndrome.
- 5 Define the terms of Invasion and metastasis.
- 6 Explain the types of shocks with mechanism.
- 7 Discuss the pathophysiology of tuberculosis.
- 8 Write the clinical features of chronic renal failure.
- 9 Write the biological effects of radiation.
- 10 Explain the factors influencing healing of wounds.

PART- B

Note: Answer any Four questions.

(4x10=40 Marks)

- 11 What are different types of chronic inflammation? Discuss in detail about cellular events in a chronic inflammation.
- 12 Describe the structure of MHC (Major histocompatibility complex) with a neat labelled diagram.
- 13 Write a note on pathogenesis of **i) Hypertension ii) stroke**.
- 14 Mention different autoimmune disorders. Discuss the Pathogenesis of Asthma & COPD.
- 15 Discuss the pathogenesis of Diabetes Mellitus and how Advanced Glycation End Products formed.
- 16 Explain the Etiology and Pathogenesis of cancer.
- 17 Discuss the Etiopathogenesis of AIDS.
- 18 Explain the Pathogenesis of Starvation and obesity.

FACULTY OF PHARMACY

Pharm-D (6-YDC) II-Year (Main & Backlog) Examination, December 2020

Subject : Pharmacotherapeutics-I**Time : 2Hours****Max. Marks: 70****PART-A****Note : Answer any Six questions****(6 x 5 = 30Marks)**

- 1 What is Tidal volume and Force Expiratory volume.
- 2 Define Rational use of drugs.
- 3 Differentiate COPD and Asthma.
- 4 Classify hypertension according to JNC-7.
- 5 Write about the role of incretins in Diabetes Mellitus.
- 6 Give the formulas for dose calculations in Paediatric population.
- 7 List out the thyroid profile tests with their normal values.
- 8 Write a note on different types of Myocardial Infarction.
- 9 What are the functions of estrogen & progesterone?
- 10 Write about cardiacglycosides.

PART-B**Note : Answer any Four questions****(4x10 = 40Marks)**

- 11 Write about the treatment of DM-II in detail.
- 12 Describe the general prescribing guidelines in Geriatrics.
- 13 a) Discuss about hormone replacement therapy & its applications.
b) Define glaucoma and write its pharmacotherapy.
- 14 a) Discuss the role of pharmacist in rational use of injectables.
b) Explain the pharmacotherapy of asthma.
- 15 a) Write about Drug induced pulmonary diseases.
b) Explain the treatment of hypothyroidism.
- 16 a) List out the symptoms & pharmacotherapy of unstable Angina.
b) Explain the etiopathogenesis of Osteoporosis.
- 17 Discuss the etiopathogenesis and treatment of hyperlipidaemias.
- 18 a) Write about Renin Angiotensin Aldosterone System.
b) Explain the pharmacotherapy of Arrhythmias.

FACULTY OF PHARMACY

Pharm-D (6-YDC) II-Year (Main & Backlog) Examination, December 2020

Subject : Community Pharmacy

Time : 2 Hours

Max. Marks: 70

PART-A

Note : Answer any Six questions.

(6x5=30 Marks)

- 1 What are the objectives of stocking?
- 2 What do you mean by lead time?
- 3 Mention two counselling information while dispensing anti TB drugs.
- 4 How prescriptions are handled?
- 5 What is rational use of medicines?
- 6 Write the clinical manifestations of typhoid.
- 7 Define OTC medication.
- 8 What is schedule N?
- 9 Define community pharmacy.
- 10 Define health according to WHO.

PART-B

Note : Answer any Four questions.

(4x10=40 Marks)

- 11 Give the principles of practice of pharmacy. Reproduce the pharmacy oath as per pharmacy council of India?
- 12 Explain various types of Inventory control techniques used for the procurement of medicines.
- 13 Define pharmaceutical care? What are roles and responsibilities of community pharmacists in providing pharmaceutical care?
- 14 Explain pathophysiology, symptoms and prevention of malaria.
- 15 a) Write a note on various records to be maintained in retail medical store.
b) What are the roles and responsibilities of community pharmacist.
- 16 What are the various parts of the prescription? Explain the legality of prescriptions?
- 17 What are the barriers of counselling? Explain different stages of counselling
- 18 Explain pathophysiology and drug therapy to worm infestations and diarrhea?

FACULTY OF PHARMACY

Pharm - D (6-YDC) II-Year (Main & Backlog) Examination, December 2020

Subject :Pharmacology-I

Time : 2 Hours

Max. Marks: 70

PART-A

Note : Answer any Six questions.

(6x5=30 Marks)

- 1 Explain in brief about Tachyphylaxis
- 2 Write a note on Anti-tussives.
- 3 Differentiate between general anaesthetics and local anaesthetics.
- 4 Describe the mechanism of action of Morphine
- 5 Classify anti-arrhythmic agents.
- 6 Give two examples of Phase-II reactions/Conjugation Reactions.
- 7 Define Anti-Psychotic drugs. Give examples.
- 8 Enlist the drugs used to treat Myasthenia gravis.
- 9 Explain the pharmacological actions of Prostaglandins.
- 10 Discuss the significance of cognition enhancers.

PART-B

Note : Answer any Four questions.

(4x10=40 Marks)

- 11 Classify Sympathomimetics with examples. Write the pharmacological actions, adverse effects and therapeutic uses of any two classes of drugs.
- 12 a) Classify NSAIDs. Explain the mechanism of action of Aspirin and paracetamol.
b) Write a note on Mood stabilizers.
- 13 a) Explain in detail about treatment for Organophosphorus poisoning
b) Describe in detail about factors modifying drug action
- 14 a) Describe the drug therapy for Congestive Heart Failure (CHF)
b) Classify Anti-anginal agents
- 15 Write the classification of β -blockers. Explain the mechanism of action, adverse effects and therapeutic uses of any two drugs.
- 16 a) Classify the drugs used in the treatment of Asthma.
b) Write a note on Expectorants and Nasal decongestants
- 17 Define Oral Hypoglycaemic agents? Classify them with examples. Write the mechanism of action of any three classes of drugs.
- 18 a) Classify anti-histamines with examples. Write the pharmacological actions, adverse effects and therapeutic uses of any two drugs.
b) Write a note on 5-HT₃ antagonists.

FACULTY OF PHARMACY**Pharm-D (6-YDC) II-Year (Main & Backlog) Examination, December 2020****Subject : Pharmacognosy and Phytopharmaceuticals****Time : 2 Hours****Max. Marks: 70****PART-A****Note : Answer any SIX questions.****(6 x 5=30 Marks)**

- 1 Define i) Pharmacognosy ii) Crude drugs
- 2 Note on Ergastic substances.
- 3 Define i) Denaturation ii) Isoelectric point.
- 4 Powder micro scopy of Podophyllum.
- 5 Write a note on Natural pesticides.
6. Chemical test for Senna and Starch.
- 7 Sinoda Test and Baljet test.
- 8 Powder micro scopy of Cinnamon. Microscopy
- 9 Write the sources, active constituents and uses of Honey.
- 10 Differences between Gums and mucilage.

PART-B**Note : Answer any FOUR questions.****(4x10=40 Marks)**

- 11 a) Enumerate the classification crude drugs, explain Pharmacological Crude drugs.
b) Write the Cultivation collection of Cinchona.
- 12 Explain in briefly Exo and Endo genius Factor Affecting Cultivation of crude drugs.
- 13 a) Define Carbohydrates and colour Reaction for Carbohydrates.
b) Write the sources, active constituents and uses Agar and Starch
- 14 Explain different methods of adulteration of crude drugs.
- 15 a) Define and Classify Volatile oil, Explain one methods of Extraction of Volatile Oil.
b) Write the sources, active constituents and uses Ginger.
- 16 Draw T S of Clove and Fennel.
- 17 a) Define and Classify Surgical Dressing add a note on Cotton.
b) Write the I P methods of Analysis of Lipids.
- 18 a) Define and classify Protein, chemical test for Protein.
b) Write the Estimation of Protein.

FACULTY OF PHARMACY

Subject : Pharmaceutical Microbiology

Time: 3 Hours

Max. Marks: 70

Note: Answer all Questions from Part-A, Answer any Five Questions from Part-B.

PART- A (10x2 = 20 Marks)

Write about :

1. Antiseptics
2. Booster dose
3. Differences between Exotoxins and Endotoxins
4. Negative Staining
5. Fungi
6. Photo Lithotrophs
7. Macconkey's media
8. Generation time
9. Schick's test
10. Pastcurization

PART-B (5X10 = 50 Marks)

- | | | |
|--------|--|----|
| 11. a) | Discuss the importance of microbes in medical microbiology | 4 |
| | b) Write a brief note on the contribution of Pasteur in history and development of microbiology. | 6 |
| 12. a) | Write the general characteristics of viruses | 4 |
| | b) Write a note on cultivation of acerbic bacteria | 6 |
| 13. a) | Describe the general methods of classification of bacteria | 5 |
| | b) Explain the methods and techniques used in bacterial and viral incineration. | 5 |
| 14. a) | Discuss the various methods of sterilization of pharmaceutical products | 6 |
| | b) Write about sterility testing | 4 |
| 15. a) | What are disinfectants. Explain the mechanism of action of common disinfectants | 7 |
| | b) Write any one evaluation test for disinfectants | 3 |
| 16. a) | Write a note on the structure of antibody | 3 |
| | b) Give an account on various antigen-antibody reactions | 7 |
| 17. | Write the principle and procedure for microbial assay of antibiotics as per I.P | 10 |
| 18. | Write a short note on: | 10 |
| | a) Cholera | |
| | b) Hepatitis | |

FACULTY OF PHARMACY

Subject : Pharmacognosy and Phytopharmaceuticals

Time: 3 Hours

Max. Marks: 70

Note: Answer all Questions from Part-A, Answer any Five Questions from Part-B.

PART- A (10x2 = 20 Marks)

1. Write the scope of Pharmacognosy.
2. Define the terms crude drug and adulteration.
3. Write note on storage of crude drugs.
4. Write the functions of plant cell wall.
5. Give the general microscopic characters of a leaf drug.
6. Give the powder microscopic characters of clove flower bud.
7. Write two chemical tests for carbohydrates.
8. Name different analytical parameters for fats and oils.
9. Write the classification of proteins.
10. Write the functions of surgical dressings.

PART-B (5x10 = 50 Marks)

- | | |
|---|----|
| 11. a) Explain morphological and chemical classification of crude drugs with suitable examples. | 5 |
| b) Write a note on factors effecting cultivation of crude drugs. | 5 |
| 12. a) Write about different non-living cell inclusions (ergastic substances). | 4 |
| b) Explain the microscopic features fennel fruit with a neat labelled diagram. | 6 |
| 13. a) What are natural pesticides? Write about any one natural pesticide. | 5 |
| b) What is aseptic propagation? Write its advantages. | 5 |
| 14. a) Explain the importance of different plant growth regulators. | 6 |
| b) Write the biological source, chemical constituents and uses of any one Volatile oil yielding crude drug. | 4 |
| 15. Write the pharmacognostic details of tragacanth. | 10 |
| 16. a) Write BS, CC and uses of shark liver oil and bees wax. | 6 |
| b) Write a note on analysis of lipids. | 4 |
| 17. a) What are glycosides? Classify glycosides. | 5 |
| b) What are tannins? Classify tannins with suitable examples. | 5 |
| 18. a) Explain adulteration of crude drugs. | 7 |
| b) Write BS, CC and uses of a natural fibre yielding crude drug. | 3 |

FACULTY OF PHARMACY**Subject : Pharmacology – I****Time: 3 Hours****Max. Marks: 70****Note:** Answer all Questions from Part-A, Answer any Five Questions from Part-B.**PART- A (10x2 = 20 Marks)**

1. Write the Biphasic response of Adrenaline
2. Classify Beta Blockers with examples.
3. Write the Physiological role of Histamine
4. Write a note on Anti – diuretic Hormone (ADM)
5. How do you do Pre – CLINICAL Evaluation
6. Write the treatment for Glaucoma
7. Write the mechanism of action of clofibrate
8. Write a note on oral Contraceptives
9. Write about the 5-MT (5-hydroxy tryptamine) Antagonists.
10. Write the metabolism of Alcohol

PART-B (5X10 = 50 Marks)

11. Classify Anti – cholinergic drugs with example. Write the pharmacological actions, adverse effects and therapeutic uses of Atropine 10
12. a) Classify oral hypoglycemic agents. Explain in detail about any two classes of drugs 6
 b) Write the actions of oxytocin 4
13. a) Write the synthesis, pharmacological actions and adverse effects of Histamine 6
 b) Write a note on platelet activating factor 4
14. Explain in detail about the Biotransformation reactions. 10
15. a) Define parkinsonism and write the treatment in detail. 6
 b) Write a note on Neuromuscular blocking agents 4
16. a) What are cardiac glycosides? Write the pharmacological actions and therapeutic uses of them in detail 6
 b) Write about the role of Diuretics in Hypertension 4
17. a) What are opioid analgesics? Classify with examples. Write the pharmacological actions of morphine 5
 b) Write a note on cognition enhancers 5
18. a) Define a receptor. Write in detail about different types of receptors. 6
 b) What factors influence the absorption of a drug 4

FACULTY OF PHARMACY

Pharm D (6-YDC) II-Year (Instant) Examination, February 2020
Subject : Community Pharmacy

Time: 3 Hours**Max. Marks: 70**

Note: Answer all Questions from Part-A, Answer any Five Questions from Part-B.

PART- A (10x2 = 20 Marks)

- 1) Give the WHO definition of Health.
- 2) Define prescription. Write the parts of prescription.
- 3) List out four commonly used NSAIDS.
- 4) Define ABC and VED.
- 5) Write the drug therapy for worm's infestations.
- 6) Write the causative agents for syphilis and gonorrhoea.
- 7) Define Lead time and Safety stock.
- 8) Define Idiosyncrasy.
- 9) Define pharmaceutical care.
- 10) Define Inventory control.

PART- B (5x10 = 50 Marks)

- | | | |
|-----|--|----|
| 11) | Write about the causative agents, clinical presentation and prevention of | |
| | (a) Tuberculosis | 5 |
| | (b) Leprosy | 5 |
| 12) | Write the pathophysiology, common drug therapy to following ailments | |
| | (a) Vomiting | 5 |
| | (b) Pyrexia | 5 |
| 13) | (a) Write a note on the various barriers to patient counselling and the strategies to overcome them. | 5 |
| | (b) Explain EOQ model with an example. | 5 |
| 14) | Describe the methods for screening of | |
| | (a) Cholesterol | 5 |
| | (b) Lung function | 5 |
| 15) | (a) Explain the role of pharmacist in rational drug therapy. | 5 |
| | (b) Explain various registers used in community pharmacy management. | 5 |
| 16) | (a) write a note on use of computers in community pharmacy. | 5 |
| | (b) Write about pharmacist in relation to his job and profession | 5 |
| 17) | Write in detail about Pharmaceutical care. | 10 |
| 18) | Define patient medication Adherence. Explain the role of pharmacist in improving the adherence. | 10 |

FACULTY OF PHARMACY
Pharm D (6-YDC) II-Year (Instant) Examination, January 2020

Subject : Pathophysiology

Time: 3 Hours

Max. Marks: 70

Note: Answer all Questions from Part-A, Answer any Five Questions from Part-B.

PART- A (10x2 = 20 Marks)

- | | |
|---|---|
| 1) Define the terms Hyperplasia and Metaplasia? | 2 |
| 2) Write the formation of Advanced Glycation End products? | 2 |
| 3) Write a short note on Wound Healing? | 2 |
| 4) Write a note on Prostaglandins involved in inflammation? | 2 |
| 5) Write a note on MHC antigens? | 2 |
| 6) Write the deficiency symptoms of Vitamin D? | 2 |
| 7) Explain pathophysiology of Starvation? | 2 |
| 8) Discuss Clinical complications of Diabetes mellitus? | 2 |
| 9) Briefly write about components of Immune system? | 2 |
| 10) Write pathogenesis of Peptic ulcer disease? | 2 |

PART- B (5x10 = 50 Marks)

- 11) a) Explain etiopathogenesis of Hypertension?
 b) Write a note on Glycogen Storage diseases?
- 12) Explain in detail Type III and Type IV Hypersensitivity reactions?
- 13) a) Explain mechanism involved in Transplant rejection?
 b) Write a note on Auto Immunity?
- 14) Explain Pathogenesis of Acute Inflammation?
- 15) a) Explain pathogenesis of Tuberculosis?
 b) Explain Invasion and Metastasis involved in Neoplasia?
- 16) Explain etiopathogenesis of AIDS
- 17) a) Write the pathogenesis of CHF?
- 18) Write a note on types of Cell Death? Explain Mechanism involved in Apoptosis with Neat labelled Diagram?

FACULTY OF PHARMACY
Pharm D (6-YDC) II-Year (Instant) Examination, February 2020
Subject : Pharmacotherapeutics-I

Time: 3 Hours

Max. Marks: 70

Note: Answer all Questions from Part-A, Answer any Five Questions from Part-B.

PART- A (10x2 = 20 Marks)

- 1 What is Hypertensive crisis?
- 2 Write a note on significance of Omega -3 fatty acids in dyslipidaemia.
- 3 What is the difference between Right Sided and Left sided heart failure?
- 4 Define Torsade de pointes.
- 5 What is Lactic acidosis, which antidiabetic agents can cause this effect?
- 6 Define chronic bronchitis and emphysema.
- 7 Define thyrotoxicosis.
- 8 What are the indications of Hormone Replacement Therapy (HRT)?
- 9 Give any four examples of drugs which are contraindicated during pregnancy.
- 10 What is the role of ACE inhibitors in Proteinuria?

PART- B (5x10 = 50 Marks)

- 11 a) Define Rationale use of Drugs and add a note on role of pharmacist. 6
 b) Explain in detail about Bacterial Conjunctivitis. 4
- 12 What is New York Heart Association (NYHA) classification of Heart failure, write a role on Digitalis glycosides and Vasodilators. 10
- 13 Classify Anti Arrhythmic drugs and explain in detail about class III & IV agents. 10
- 14 a) Write a note on Incretin based therapy. 4
 b) Based on the duration of action, classify and explain different insulin analogues. 6
- 15 Explain in detail about pathophysiology involved asthma and add a note on Bronchodilators. 10
- 16 a) How pulmonary function testing can be evaluated by using spirometry 5
 b) What are the treatment options for acute exacerbations of COPD? 5
- 17 Write in detail about prescribing guidelines of pediatric patients on the basis of pharmacokinetic parameters 10
- 18 Describe in detail about pathophysiology and pharmacotherapy of osteoporosis.

FACULTY OF PHARMACY**Pharm D (6-YDC) II-Year (Main & Backlog) Examination, June/July 2019****Subject : Pharmacology – I****Time: 3 Hours****Max. Marks: 70****Note:** Answer all Questions from Part-A, Answer any Five Questions from Part-B.**PART- A (10x2 = 20 Marks)**

1. Elaborate Dale's Vasomotor reversal of adrenaline
2. Classify alpha blockers with examples
3. Write the pharmacological actions of serotonin
4. Write the mechanism of action of Aspirin
5. Write in brief about mucolytics in detail
6. Write a note on Insulin preparations
7. Classify different routes of administration
8. Explain in brief about tachyphylaxis
9. Write a note on metformin
10. Write the mechanism of action of opioid analgesics

PART-B (5X10 = 50 Marks)

11. Classify Adrenergic drugs with examples. Write the pharmacological actions, adverse effects and therapeutic uses of any one drug. 10
12. a) What are Bronchodilators? Classify with examples. Write a note on salbutamol 6
b) Write in brief about nasal decongestants 4
13. Explain about the factors modifying the drug action 10
14. a) What are anti – hypertensives? Classify with examples. Write in detail about any two classes of drugs 6
b) How do you treat hyperlipidaemia 4
15. a) Write about the Toxicity studies in detail 5
b) Explain in brief about Drug – drug interactions 5
16. a) Classify sedative and Hypnotics with examples. Write about any 2 drugs in details 7
b) Write a note on local anesthetics 3
17. a) Classify NSAIDS (Non – steroidal Anti – inflammatory Drugs) with examples. Explain in detail about any one drug 5
b) Write a note on general anesthetics 5
18. a) Classify Anti-Histamines with examples. Write the Pharmacological actions, adverse effects and therapeutic uses of any one drug 6
b) Write a note on thyroid disorders 4

FACULTY OF PHARMACY

Pharm D (6-YDC) II-Year (Main & Backlog) Examination, June 2019

Subject : Pathophysiology

Time: 3 Hours

Max. Marks: 70

Note: Answer all Questions from Part-A, Answer any Five Questions from Part-B.**PART- A (10x2 = 20 Marks)**

- 1) Define the terms Hypertrophy and Hyperplasia? 2
- 2) Differentiate between Necrosis and Apoptosis? 2
- 3) Write a note on abnormalities in Lipoproteinaemia. 2
- 4) List out Chemical Mediators involved in inflammation? 2
- 5) Write the etiological factors involved in Cell Injury? 2
- 6) Write the deficiency symptoms of Vitamin B? 2
- 7) Explain pathogenesis of Typhoid fever? 2
- 8) Discuss Clinical Complications of Obesity? 2
- 9) Briefly write about components of immune system? 2
- 10) Write pathogenesis of malaria? 2

PART- B (5x10 = 50 Marks)

- 11) a) Explain etiopathogenesis of inflammatory bowel disease? 7
b) Write a note on advanced Glycation End products? 3
- 12) Explain in detail Type II and Type III hypersensitivity reactions? 10
- 13)(a) Explain mechanism of Invasion and Metastasis in Neoplasia? 7
(b) Write a note on p₅₃ gene? 3
- 14) Explain Etiopathogenesis of SHOCK? 10
- 15)(a) Explain Mechanism involved in Transplant rejection? 6
(b) Write a note on Hepatitis? 4
- 16) a) Explain pathogenesis of Acute Kidney Failure? 6
b) Write the pathogenesis of Asthma? 4
- 17) a) Write the pathogenesis of Hypertension? 5
b) Write the pathogenesis of Type I Diabetes mellitus? 5
- 18) Write a note on types of Cell Death? Explain Mechanism involved in Apoptosis with Neat labelled Diagram? 10

FACULTY OF PHARMACY

Pharm D (6-YDC) II-Year (Main & Backlog) Examination, June 2019

Subject : Pharmaceutical Microbiology

Time: 3 Hours

Max. Marks: 70

Note: Answer all Questions from Part-A, Answer any Five Questions from Part-B.**PART- A (10x2 = 20 Marks)****Write about:**

1. Spirochetes
2. Lithotrophs
3. Differential Staining
4. Tyndallization
5. Sterilization
6. Widal test
7. Active immunity
8. Selective media
9. Synchronous and Continuous growth
10. Food Microbiology

PART-B (5X10 = 50 Marks)

11. a) Write about fungi
- b) Discuss about microbes importance in Industrial microbiology.
12. a) Write different methods of microbial classification
- b) Differentiate between gram 't' ve and gram '- ve bacteria
13. a) Discuss the physical methods of sterilization 5
- b) Write in brief about the validation of sterilization processes. 5
14. Explain various methods of
 - a) Solation of bacteria 5
 - b) Preservation of pure cultures 5
15. a) Write about different fungicidal agents with their mode of action.
- b) Give an account on evaluation of disinfectants,.
16. Write a note on
 - a) Blotting techniques 3
 - b) Microbiological assay of antibiotic – penicillin 7
17. a) Write the preparation and standardization of any one bacterial vaccine 5
- b) What are serological reactions. Write about Radio immune assay. 5
18. Write a note on pathogenesis, lab diagnosis treatment and prevention of
 - a) HIV 5
 - b) Malaria 5

FACULTY OF PHARMACY**Pharm D (6-YDC) II-Year (Main & Instant) Examination, July 2019****Subject : Pharmacotherapeutics-I****Time: 3 Hours****Max. Marks: 70****Note:** Answer all Questions from Part-A, Answer any Five Questions from Part-B.**PART- A (10x2 = 20 Marks)**

- 1 Define orthostatic hypotension.
- 2 Write a note on Digitalis toxicity.
- 3 What is the role of Renin inhibitors in controlling hypertension?
- 4 Write a note on different types of Angina.
- 5 What are Insulin sensitisers, give any two examples?
- 6 What are the different stages at acute exacerbations of COPD.
- 7 Give any four differences between Propylthianacil.
- 8 Write a note on Residual Volume and Tidal Volume.
- 9 Explain Thalidomide disaster.
- 10 What is the role of α -glucosidase inhibitors in controlling diabetes Mellitus?

PART- B (5x10 = 50 Marks)

- 11 Classify Anti hypertensive drugs and add a note on ACE inhibitors and calcium channel Blockers. 10
- 12 a) Explain in detail about biochemical markers in detecting MI. 6
b) Write a note on Fibrinolytic therapy. 4
- 13 a) What are the complications of DM II. 4
b) What is diabetic Ketoacidosis? And add a note on its management. 6
- 14 a) Describe in detail about Drug induced pulmonary disorders. 5
b) What are the different devices used for inhaled medicines in Asthma? 5
- 15 Write in detail about prescribing guidelines of geriatric patients based on their pharmacokinetic parameters. 10
- 16 What are the different types of glaucoma and explain in detail about its treatment? 10
- 17 a) Write a note on oral contraceptive pills. 5
b) Explain the Significance of Bisphosphonates in treating osteoporosis 5
- 18 a) Explain in detail about essential drug concept. 6
b) What are the different issues concerned with pregnancy. 4

FACULTY OF PHARMACY**Pharm D (6-YDC) II-Year (Main & Backlog) Examination, July 2019****Subject : Community Pharmacy****Time: 3 Hours****Max. Marks: 70****Note:** Answer all Questions from Part-A, Answer any Five Questions from Part-B.**PART- A (10x2 = 20 Marks)**

- 1) Define EOQ.
- 2) What is C-prescription.
- 3) Define Code of Ethics.
- 4) Write the drug therapy for Constipation.
- 5) Define OTC medication. Write at least two examples.
- 6) Define Balance diet. Write the composition of Balance diet.
- 7) Define Coding and Stocking.
- 8) List out the various factors to be considered during selection of appropriate site for community pharmacy.
- 9) What is Bin card system in inventory control?
- 10) Define community pharmacy.

PART-B (5x10 = 50 Marks)

- | | | |
|-----|--|----|
| 11) | Write about the causative agents, clinical presentation and prevention of | |
| | (a) Amoebiasis | 5 |
| | (b) Malaria | 5 |
| 12) | Write the pathophysiology, common drug therapy to | |
| | (a) Worms infestations. | 5 |
| | (b) Dyspepsia. | 5 |
| 13) | (a) Explain the roles and responsibilities of community pharmacist. | 5 |
| | (b) Write the legal requirements for the establishment of retail drug store. | 5 |
| 14) | (a) Write the role of pharmacist in family planning. | 5 |
| | (b) Write the essential principles of pharmaceutical care. | 5 |
| 15) | (a) Define and describe various factors affecting medication adherence. | 5 |
| | (b) Write a note on the use of computers in community pharmacy | 5 |
| 16) | (a) Define the prescription. Write a note on the parts of prescription and their legality. | 5 |
| | (b) Write about screening of B.P. | 5 |
| 17) | Define rational drug use (RDU). Explain the role of pharmacist in improving RDU. | 10 |
| 18) | Define Inventory control. Explain the various methods of Inventory control. | 10 |

FACULTY OF PHARMACY

Pharm D (6-YDC) II-Year (Main & Backlog) Examination, June 2019

Subject : Pharmacognosy and Phytopharmaceuticals**Time: 3 Hours****Max. Marks: 70****Note:** Answer all Questions from Part-A, Answer any Five Questions from Part-B.**PART- A (10x2 = 20 Marks)**

1. Define the terms Pharmacognosy and Crude drug.
2. Write the advantages of cultivation of crude drugs.
3. Write the components and functions of plant cell wall.
4. Give the general microscopic characters of a bark drug.
5. Give the powder microscopic characters of senna leaf let.
6. Write two chemical tests for tannins.
7. Name different analytical parameters for fats and oils.
8. Write biological source and uses of bees wax.
9. Write a note on gelatine.
10. Write the functions of surgical dressings.

PART-B (5X10 = 50 Marks)

11. a) Write taxonomical and pharmacological classification of crude drugs. 6
b) Write the functions of various organelles of a plant cell. 4
12. Explain the cultivation, collection, processing and storage of crude drugs briefly. 10
13. a) Explain the microscopic characters of clove flower bud with a neat labelled diagram. 5
b) Explain the microscopic characters of ephedra stem with a neat labelled diagram. 5
14. a) What are natural pesticides? Write about any one natural pesticide. 5
b) What are alkaloids? Write the chemical tests for alkaloids. 5
15. Write notes on Honey and starch. 10
16. a) Write the chemical tests for identification of carbohydrates. 5
b) Write different tests for analysis of oils and fats. 5
17. Write BS, method of preparation, cc and uses of shark liver oil and cocoa butter. 10
18. a) Write BS, preparation and uses of absorbent cotton. 6
b) What is adulteration? Mention different types of adulteration. 4

FACULTY OF PHARMACY

Pharm D (6–YDC) II – Year (Main&Backlog) Examination, August 2018

Subject: Pharmacotherapeutics – I

Time: 3 Hours

Max.Marks: 70

Note: Answer all questions from Part – A. Any Five questions from Part – B.

PART – A (10x2 = 20 Marks)

- 1 List out the secondary causes of hypertension.
- 2 What are the signs and symptoms of right sided heart failure?
- 3 What are the 3 characteristic features of angina?
- 4 Classify antiarrhythmic drugs.
- 5 Define forced vital capacity and give the significance of FEV1/FVC.
- 6 Distinguish the features of inflammation between asthma and COPD.
- 7 Give any four examples of teratogenic drugs along with their complications.
- 8 Write the causative organisms for bacterial conjunctivitis.
- 9 Write a note on essential drug concept.
- 10 Write briefly about various tests to evaluate thyroid function.

PART – B (50 Marks)

- | | | |
|----|---|----|
| 11 | a) Classify antihypertensive agents and discuss briefly their role in the management of hypertension. | 7 |
| | b) Discuss the role of hormone replacement therapy in post-menopausal women. | 3 |
| 12 | a) Write the algorithm for management of stage A and B heart failure. | 6 |
| | b) What are the life style modifications for management of Dyslipidaemia? | 4 |
| 13 | a) Write the algorithm for management of NSTEMI. | 7 |
| | b) Write a note on prevention of viral conjunctivitis. | 3 |
| 14 | a) Explain the role of DPPIV inhibitors and SGLT2 inhibitors in management of diabetes mellitus. | 6 |
| | b) Write a note on glucocorticoid induced osteoporosis. | 4 |
| 15 | a) Explain the role of beta agonists in management of asthma. | 7 |
| | b) Give any four examples of drugs that cause pulmonary diseases. | 3 |
| 16 | a) Explain the pharmacology of antithyroid drugs. | 6 |
| | b) Write a note on oral contraceptives. | 4 |
| 17 | a) Explain the alteration of the distribution of drugs in pediatrics. | 5 |
| | b) Explain transplacental drug transfer. | 5 |
| 18 | Explain the role of pharmacist in rational use of drugs. | 10 |

FACULTY OF PHARMACY

Pharm D (6–YDC) II – Year (Main & Backlog) Examination, July 2018

Subject: Pharmacology – I

Time: 3 Hours

Max.Marks: 70

Note: Answer all questions from Part – A. Any Five questions from Part – B.

PART – A (10x2 = 20 Marks)

- 1 What is meant by Biphasic response of adrenaline?
- 2 Write about the disadvantages of parenteral route of administration.
- 3 Define the terms – Tachyphylaxis and synergism.
- 4 Write in brief about the pathophysiological role of histamine.
- 5 How do you treat schizophrenia?
- 6 Explain the mechanism of action of barbiturates.
- 7 Write the therapeutic uses of beta blockers.
- 8 Classify alpha – blockers with examples.
- 9 What are the actions of oxytocin?
- 10 Write a note on 5-HT₂ antagonists.

PART – B (50 Marks)

- | | |
|---|----|
| 11 a) Classify anti-hypertensives with examples. | 5 |
| b) Explain in detail about any two classes of anti-hypertensives. | 5 |
| 12 a) Write the pharmacological action of isoprenaline. | 5 |
| b) Write a note on organophosphorus poisoning and treatment. | 5 |
| 13 Explain in brief about anti-arrhythmic drugs. | |
| 14 a) Write about the thyroid disorders. | 4 |
| b) Classify anti-thyroid drugs with examples. Explain any two classes of drugs. | 6 |
| 15 Explain in detail about <i>the drugs used in bronchial asthma</i> . | 10 |
| 16 a) <i>What are non-opioid analgesics?</i> Classify the drugs with examples. | 5 |
| b) Write the pharmacological actions of aspirin. | 5 |
| 17 a) Explain in detail about the general anaesthetics. | 7 |
| b) Write about the actions of alcohol. | 3 |
| 18 a) Write the pharmacological actions of phenytoin. | 5 |
| b) Explain in brief about H ₂ -receptor antagonists. | 5 |

FACULTY OF PHARMACY

Pharm D (6–YDC) II – Year (Main & Backlog) Examination, July 2018

Subject: Pharmacognosy & Phytopharmaceuticals

Time: 3 Hours

Max.Marks: 70

Note: Answer all questions from Part – A. Any Five questions from Part – B.

PART – A (10x2 = 20 Marks)

- 1 Mention the biological role of proteins.
- 2 List out different extraction methods of fixed oil. Explain any one.
- 3 Write a note on:
 - i) Scarification
 - ii) Isoelectric point
- 4 Mention any two general identification tests for alkaloids.
- 5 Write about carbohydrate derived products with examples.
- 6 Mention the biological sources and uses of cod liver oil.
- 7 List out different types of vegetative propagation of crude drugs with examples.
- 8 Define adulteration. What are different methods of evaluation of crude drugs?
- 9 Write about:
 - a) Shinoda test
 - b) Enfleurage
- 10 What are “Bitters”? Give examples.

PART – B (50 Marks)

- | | |
|--|----|
| 11 a) Write a note on factors affecting cultivation of crude drugs with example. | 6 |
| b) Discuss morphological and taxonomical method of classification of crude drugs with examples. | 4 |
| 12 a) Define acid value. Give the principle, significance and method to determine. | 6 |
| b) Differentiate fixed oil and volatile oil. | 4 |
| 13 a) Explain briefly “lignin and pectin” as cell wall constituents. | 6 |
| b) Define and classify glycosides with examples. | 4 |
| 14 a) Discuss the structure of protein. | 6 |
| b) List out different methods of adulteration with examples. | 4 |
| 15 Explain different methods of plant breeding with their application. | 10 |
| 16 Explain the microscopical characters of: | |
| i) Cassia | 5 |
| ii) Coriander | 5 |
| with neat labelled diagram. | |
| 17 a) Define and classify natural fibres used in surgical dressings. Give the biological source, chemical constituents and uses of cotton. | 6 |
| b) Write about “Neem” as a pesticide. | |
| 18 Write the biological source, chemical constituents and uses of | |
| i) Tragacanth | |
| ii) Asafoetida | |
| iii) Cardamom | |

FACULTY OF PHARMACY

Pharm D (6–YDC) II – Year (Main & Backlog) Examination, July 2018

Subject: Pharmaceutical Microbiology

Time: 3 Hours

Max.Marks: 70

**Note: Answer all questions from Part – A. Any Five questions from Part – B.
PART – A (10x2 = 20 Marks)**

Write about:

- 1 Artificial active immunity
- 2 Disinfection
- 3 Rickettsias
- 4 Differential staining
- 5 Schick's test
- 6 Types of immunoglobulins
- 7 Photolithotrophs
- 8 Tyndallization
- 9 Halogens as sterilizing agent
- 10 Bacterial toxins

PART – B (5x10 = 50 Marks)

- 11 a) Write a note on general characteristics of fungi.
b) Give an account on bacterial growth curve.
- 12 a) Explain the differences between gram '+ve and gram '-ve bacteria.
b) Write about the classification of bacteria according to Bergey's manual.
- 13 a) Write a detailed note on how to maintain lab cultures.
b) Write about the enumeration techniques of bacteria.
- 14 a) Discuss on the physical methods of sterilization.
b) Write about different fungicidal agents with their mode of action.
- 15 a) Explain the mechanism of action of various disinfectants.
b) Write a note on validation of sterilization.
- 16 a) Write a note on microbial assay of penicillin.
b) Write a note on official vaccines.
- 17 a) Write a note on malarial parasite.
b) Discuss about the infectious disease cholera.
- 18 a) Discuss about ELISA.
b) Write about Gonorrhoea.

FACULTY OF PHARMACY

Pharm D (6–YDC) II – Year (Main & Backlog) Examination, July 2018

Subject: Pathophysiology

Time: 3 Hours

Max.Marks: 70

Note: Answer all questions from Part – A. Any Five questions from Part – B.**PART – A (10x2 = 20 Marks)**

- 1 Define the terms – Hypertrophy and Atrophy.
- 2 Write the deficiency symptoms of Vit A.
- 3 Write a short note on Adhesion molecules.
- 4 Draw a neat labelled diagram of MHC (Major Histo compatibility) molecule.
- 5 Write the biological effects of carbon monoxide.
- 6 Write the pathophysiology of urinary tract infections.
- 7 Write about the neurotransmitters involved in depression and mania.
- 8 Write the clinical manifestations of alcoholic liver disease.
- 9 Explain in brief about etiological factors of crohn's disease.
- 10 What are the causes of cell injury?

PART – B (50 Marks)

- | | |
|---|----|
| 11 Write in detail about STDs. | 10 |
| 12 Write the etiopathogenesis of Type – II diabetes mellitus. | 10 |
| 13 a) Explain about T-lymphocytes and B-lymphocytes with a neat labelled diagram. | 6 |
| b) Write the mechanism of transplant rejection. | 4 |
| 14 a) Explain the vascular events of inflammation. | 6 |
| b) Write a note on glycogen storage diseases. | 4 |
| 15 a) Write the etiopathogenesis of hypertension. | 6 |
| b) Explain the hypertrophy in congestive heart failure (CHF). | 4 |
| 16 a) Write a note on lipid peroxidation. | 4 |
| b) Write about the etiopathogenesis of STROKE. | 6 |
| 17 Write in detail about tumour suppressor genes. | 10 |
| 18 Explain in detail about Type – I and Type – II hypersensitivity. | 10 |

FACULTY OF PHARMACY**Pharm D (6–YDC) II – Year (Main & Backlog) Examination, July 2018****Subject: Community Pharmacy****Time: 3 Hours****Max.Marks: 70****Note: Answer all questions from Part – A. Any Five questions from Part – B.****PART – A (10x2 = 20 Marks)**

- 1 Define community pharmacy.
- 2 Define pharmaceutical care.
- 3 Write a note on medication errors.
- 4 Write the barriers in patient counseling.
- 5 Write the drug therapy to worm's infestations.
- 6 Explain about VED analysis.
- 7 Define health screening services. Write its importance.
- 8 Write clinical presentations of T.B.
- 9 Write factors affecting medication adherence.
- 10 Write the opportunistic infections in AIDS.

PART – B (50 Marks)

- | | |
|---|----|
| 11 a) Define the concept of management. Describe the functions of management in detail with suitable pharmaceutical examples. | 7 |
| b) Explain about maintenance of registers in community pharmacy. | 3 |
| 12 a) Write a note on the parts of prescription and their legality. | 5 |
| b) Explain the role of computers in community pharmacy. | 5 |
| 13 a) Define patient counseling. Explain various stages in patient counseling. | 7 |
| b) Write a note on patient information leaflet. | 3 |
| 14 Explain the etiology, clinical presentations and prevention of | |
| a) Gonorrhoea | 5 |
| b) Malaria | 5 |
| 15 a) Write the role of pharmacist in family planning. | 5 |
| b) Write the essential principles of pharmaceutical care. | 5 |
| 16 Explain the pharmacokinetic and pharmacodynamic changes in geriatric patients. | 10 |
| 17 Write the pathophysiology and drug therapy of the following: | |
| a) Pain | 5 |
| b) Constipation | 5 |
| 18 Explain the role of pharmacist in rational drug therapy. | 10 |

FACULTY OF PHARMACY

Pharm. D (6 YDC) II-Year (Instant) Examination, February 2015

Subject: Pathophysiology

Time: 3 hours

Max. Marks: 70

**Note: Answer all questions from Part-A and
Answer any Five questions from Part-B.**

Part – A (10 x 2 = 20 Marks)

- 1 What are the different chemical mediators of Inflammation?
- 2 Differentiate Benign Tumours from Malignant Tumours.
- 3 Write about Hypersensitivity type I.
- 4 Enumerate different types of shock.
- 5 Explain how complement system gets activated in inflammation.
- 6 Write the deficiency symptoms of Vitamin A and Vitamin E.
- 7 Write the clinical manifestations of Myocardial Infarction.
- 8 Explain the role of Neurotransmitters in Parkinsonism.
- 9 What do you mean by Delayed Hypersensitivity reaction?
- 10 Explain pathogenesis of Dysentery.

Part – B (5 x 10 = 50 Marks)

- | | |
|---|----|
| 11 a) Write the vascular events of Inflammation. | 6 |
| b) Explain how wounds in the skin are repaired. | 4 |
| 12 Describe the structure of MHC with a neat labeled diagram. | 10 |
| 13 a) Write the etiopathogenesis of peptic ulcer disease. | 6 |
| b) Explain the pathogenesis of obesity. | 4 |
| 14 a) What is immunologic tolerance? Classify and explain in detail. | 5 |
| b) Write the mechanism involved in Transplant Rejection. | 5 |
| 15 Explain the etiopathogenesis of diabetes mellitus. | 10 |
| 16 a) Write the pathogenesis of Atherosclerosis. Explain with a neat diagram. | 6 |
| b) Explain RAAS in Hypertension. | 4 |
| 17 a) Write the pathogenesis of AIDS. | 7 |
| b) Write the causes of TB and Malaria. | 3 |
| 18 a) Explain pathogenesis and symptoms of stroke. | 6 |
| b) Write in detail about different types of Angina pectoris. | 4 |

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Instant) Examination, March 2018

Subject : Community Pharmacy

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part – A, answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Define ABC and VED.
- 2 What are different types of Hepatitis?
- 3 Write the causative agents for Syphilis and Gonorrhoea.
- 4 Write the drug therapy for Norms infestation.
- 5 Define OTC medication? Write at least two examples.
- 6 Define Balance Diet. Write the composition of balance diet.
- 7 Write the importance of coding.
- 8 List out the factors to be considered during selection of appropriate site for community pharmacy.
- 9 Define patient medication Adherence.
- 10 Define Sulfone syndrome.

PART – B (5 x 10 = 50 Marks)

- 11 Write about the causative agents, clinical presentation and prevention
 - (a) Tuberculosis
 - (b) Leprosy
- 12 Write the code of ethics for community pharmacist.
- 13 Write the pathophysiology, common drug therapy to
 - (a) Vomiting
 - (b) Dyspepsia
- 14 Define community pharmacy. Explain the role and responsibilities of a community pharmacist.
- 15 Explain the role of pharmacist in family planning.
- 16 Define Rational Drug use (RDU). Explain the role of pharmacist in improving RDU.
- 17 Explain detail care for pregnant and breast feeding women.
- 18 Define the prescription. Discuss in Legality and identification of medication related problems.

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Instant) Examination, March 2018

Subject : Pharmacology – I

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part – A, answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 What is antagonism? Write the types of Antagonism with examples.
- 2 What are Nasal decongestants? Give examples.
- 3 Write one example each of Pharmacokinetic and Pharmacodynamic drug interactions.
- 4 What is Plasma protein binding? Write its significance.
- 5 What are Neuro muscular blockers? Write the mechanism of d-Tubocurarine.
- 6 What are Tocolytics? Give examples.
- 7 Write briefly on Oral contraceptives.
- 8 What is Myasthenia gravis? Name the drugs used.
- 9 Write the mechanism of action of Theophylline in bronchial asthma.
- 10 Write the role of Angiotensin receptor blockers in hypertension.

PART – B (5 x 10 = 50 Marks)

- 11 Write the advantages and disadvantages of different routes of administration of drugs.
- 12 Classify Anti-parkinsonism drugs. Write in detail about the drugs used to treat Parkinsonism.
- 13 (a) Write short notes on CNS stimulants. (4)
(b) Write in detail about local anaesthetics. (6)
- 14 (a) What is Eicosanoids? Write the biosynthesis. (4)
(b) Write pathophysiological role in Angiotensin and Prostaglandins. (6)
- 15 Write about :
(a) G-protein coupled receptors (4)
(b) Different mechanism of Absorption of drugs (6)
- 16 Classify adrenergic blockers with examples. Write the pharmacology of
(a) Prazosin (b) Propranolol
- 17 What are Androgens? Write the physiological role of sex hormones.
- 18 Classify Anti-arrhythmic drugs. Write in detail pharmacology of drugs used to treat Arrhythmias.

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Instant) Examination, March 2018

Subject : Pharmacognosy and Phytopharmaceuticals

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part – A, answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Define the term (a) Pharmacognosy (b) Substitute
- 2 Write about morphological classification with examples.
- 3 Differentiate fixed oil and volatile oil.
- 4 Explain the cell wall structure.
- 5 Write microscopical powder characters of senna.
- 6 Explain the isolation methods of resins.
- 7 Write about :
 - (a) Van-Urk's test
 - (b) Salkowski test
- 8 Define saponification value and give its significance.
- 9 What are cyanogenetic glycosides? How do you identify them?
- 10 Write the biological source and chemical constituents of sterculia gum.

PART – B (5 x 10 = 50 Marks)

- 11 Explain different methods of cultivation of crude drugs with their merits and demerits. (10)
- 12 (a) What are secondary metabolites? Give examples. (3)
 (b) Write a note on glycosides. (7)
- 13 (a) Classify natural pesticides with examples. (4)
 (b) Write the biological source, chemical constituents and uses of pyrethrum and Neem. (3+3)
- 14 (a) Explain different extraction methods of simple lipids. (5)
 (b) Write a note on drying oils with examples. (5)
- 15 Write pharmacognostic scheme of (2x5)
 (a) Rauwolfia
 (b) Cardamom
- 16 (a) Define and classify tannins with examples. Write different characteristics tests of tannins. (6)
 (b) write the biological source and chemical constituents of (4)
 (i) Benzoin (ii) Spermaceti
- 17 Discuss protein structure. How do you determine it? (10)
- 18 (a) Write a note on plant fibres used in surgical dressings. (5)
 (b) Explain the different methods of adulteration of crude drugs with examples and how do you prevent it? (5)

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Instant) Examination, March 2018

Subject : Pharmaceutical Microbiology

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part – A, answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Antiseptics
- 2 Active immunity
- 3 Importance of booster dose
- 4 Differences between Exotoxins and Endotoxins
- 5 Widal test
- 6 Negative staining
- 7 Types of immunoglobulins
- 8 Photolithotrophs
- 9 Fungi
- 10 Virucide

PART – B (5 x 10 = 50 Marks)

- 11 (a) Discuss about the microbes importance in industrial microbiology. (5)
(b) Write a brief note on Germ theory of disease with a mention of Koch's postulates. (5)
- 12 Describe the general characteristics of viruses. Write about viral replication. (10)
- 13 (a) Write about rickettsias. (5)
(b) Discuss the various methods of isolation of bacteria and the preservation of pure cultures. (5)
- 14 (a) Discuss various methods of sterilization of pharmaceutical products. (7)
(b) Write a brief note on test for sterility. (3)
- 15 (a) What are disinfectants? Write about different classes of disinfectants. (7)
(b) Write a note on R.W. (Real walker) test. (3)
- 16 Write a note on microbial assays of antibiotics and write about penicillin assay. (10)
- 17 (a) Discuss briefly on Antigen-Antibody reactions.
(b) Write a general note on principle involved in blotting techniques.
- 18 Write about pathogenesis, lab diagnosis and prevention of infection diseases
(a) HIV
(b) Tuberculosis

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Instant) Examination, March 2018

Subject : Pharmacotherapeutics – I

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part – A, answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Write the JNC 7 classification of blood pressure classification.
- 2 What are the diagnostic tests for osteoporosis?
- 3 What are the normal values of lipid panel?
- 4 What are the modifiable and non modifiable risk factors for Angina?
- 5 How does the early pharmacotherapy of NSTEMI differ from STEMI?
- 6 Write the applications of Pulmonary function Testing.
- 7 List out the agents and events that trigger Asthma.
- 8 What is essential drug concept?
- 9 Differentiate between viral and bacterial conjunctivitis.
- 10 Write a brief note on Beer's criteria for prescribing geriatric population.

PART – B (5 x 10 = 50 Marks)

- 11 (a) Write the algorithm for management of Hypertension with compelling indications. (7)
(b) Differentiate between hypertensive urgency and hypertensive crisis. (3)
- 12 (a) Write the algorithm for management of stage C heart failure. (5)
(b) Write briefly the pathophysiology of Heart Failure. (5)
- 13 (a) Explain the pharmacotherapy of management of Dyslipidaemia. (5)
(b) Write a note on class III antiarrhythmic drugs. (5)
- 14 (a) Explain the management of Prinzmetal angina. (4)
(b) Write the algorithm for management of STEMI. (6)
- 15 (a) Explain the pharmacotherapy of severe acute asthma. (7)
(b) Write a note on the various oral contraceptives. (3)
- 16 (a) Classify with examples and give the mechanism of action of oral antidiabetic drugs. (6)
(b) Write a note on goiter. (4)
- 17 (a) Explain anti-resorptive therapy in osteoporosis. (7)
(b) Write the management of bacterial conjunctivitis. (3)
- 18 (a) How is oral absorption of drugs altered in pediatrics? (5)
(b) Explain transplacental drug transfer. (5)

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Main) Examination, July 2017

Subject : Pharmacognosy and Phytopharmaceuticals

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part - A and answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 What are ergastic substances? Give examples.
- 2 Write about drying of crude drugs.
- 3 Define the terms : (a) Resin (b) Denaturation
- 4 Give the morphological classification of crude drugs with examples.
- 5 Explain the structure of calcium oxalate crystals with examples.
- 6 Explain the term : (a) Polyploidy (ii) Iodine value
- 7 Define and classify lipids with examples.
- 8 With the help of neat diagrams, give the powder characters of liquorice.
- 9 Mention the biological source and uses of sterculia.
- 10 Write about: (a) Kelles killiani test (b) Super critical fluid extraction method

PART – B (5 x 10 = 50 Marks)

- 11 (a) What are the different methods of classification of crude drugs? Write briefly about the chemical classification with examples.
(b) Explain the application of plant growth hormones.
- 12 (a) Define and mention the different methods of cultivation of medicinal plants. Mention the merits and demerits.
(b) Discuss scope of pharmacognosy.
- 13 (a) Explain how the mutation technique is helpful to improve the yield of medicinal compounds.
(b) Explain the structure of plant cell wall.
- 14 Write the pharmacognostic scheme of : (a) Ginger (b) Ergot
- 15 (a) Explain different methods of adulteration of crude drugs with examples.
(b) Write a note on natural pesticides.
- 16 With the help of neat labeled diagram explain the microscopical characters:
(a) Ephedra
(b) Datura
- 17 (a) Describe the method of preparation of cotton.
(b) What are different chemical classes of secondary metabolites? Write a short note on Tannins.
- 18 Discuss the biological source, chemical constituents and uses :
(a) Guggal (b) Ashwagandha (c) Gelatin

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Main) Examination, July 2017

Subject : Pharmaceutical Microbiology

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part - A and answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 What are Fungi?
- 2 Write about virucide.
- 3 Explain Natural immunity.
- 4 What is medical microbiology?
- 5 Structure of Bacteriophage.
- 6 What is Generation time?
- 7 Define Antibody.
- 8 Write about selective media.
- 9 Write the significance of PCR.
- 10 What are Toxoids?

PART – B (5 x 10 = 50 Marks)

- 11 (a) Discuss the importance of microbes in industrial microbiology.
(b) Write a brief note on germ theory of disease with a mention of Koch's postulates.
- 12 (a) Describe the general characteristics of viruses.
(b) Write about Rickettsias.
- 13 (a) Discuss the various methods for isolation of bacteria.
(b) Write a note on bacterial stains and explain the different staining techniques.
- 14 (a) Discuss various methods for sterilization of pharmaceutical products.
(b) Write a brief note on test for sterility.
- 15 (a) What are disinfectants? Write about different classes of disinfectants with examples..
(b) Briefly explain Rideal-walker (RW) test.
- 16 (a) Describe Schick's test and mention its uses.
(b) Discuss about western blot test and its significance.
- 17 (a) Write a note on microbial assays of antibiotics.
(b) Write about pathogenesis, lab diagnosis and prevention of HIV.
- 18 (a) Describe antigen-antibody reactions.
(b) Give a brief account of infectious diseases – Tuberculosis

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Main) Examination, July 2017

Subject : Community Pharmacy

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part - A and answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Define coding. Write its importance.
- 2 Write the legal requirements to start the community pharmacy.
- 3 Define prescription. Write parts of prescription.
- 4 Define the term Lead time and Safety stock.
- 5 Write note on patient information leaflet.
- 6 Define medication adherence.
- 7 Define OTC drugs. Give any two examples.
- 8 Write the non pharmacological treatment for constipation.
- 9 Write the WHO definition of health.
- 10 Write clinical presentations of AIDS.

PART – B (5 x 10 = 50 Marks)

- 11 (a) Describe the role and responsibilities of community pharmacist.
(b) Write the staff required in community pharmacy.
- 12 Discuss the causative agents, clinical presentations and prevention of
(a) Gonorrhoea
(b) Malaria
- 13 (a) Write the space layout and design of community pharmacy.
(b) Explain the maintenance of registers in community pharmacy.
- 14 (a) Define inventory control. Write about EOQ method.
(b) Explain the role of pharmacist in family planning.
- 15 (a) Describe the methods used for screening of blood sugar.
(b) Write a note on lung function tests.
- 16 Write the pathophysiology and drug therapy for the following:
(a) Nausea and vomiting
(b) Constipation
- 17 (a) Define patient counseling. Write the stages of patient counseling.
(b) Write a note on balanced diet.
- 18 Write the code of ethics for community pharmacist.

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Main) Examination, July 2017

Subject : Pharmacology-I

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part - A and answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Explain the triple response of Histamine.
- 2 Write the advantages of oral route of administration.
- 3 Explain in brief about the types of Antagonism.
- 4 Write the treatment for Parkinsonism.
- 5 Write the classification of Bronchodilators.
- 6 What is the pathophysiological role of 5-HT(5-Hydroxy tryptamine)?
- 7 Write the adverse effects of Insulin.
- 8 Explain the mechanism of action of local anaesthetics.
- 9 Write the pharmacology of Nicotine.
- 10 Explain about Biotransformation reaction in brief.

PART – B (5 x 10 = 50 Marks)

- 11 Explain the factors modifying drug action.
- 12 Classify parasympathomimetics with examples. Write the mechanism of action, pharmacological actions and adverse effects of Acetyl choline.
- 13 (a) Classify the drugs used in congestive Heart failure.
(b) Explain in detail about the pharmacological actions of any one drug with adverse effects in Diabetes mellitus.
- 14 (a) What are Anti-Histamines? Classify with examples. Write the pharmacological actions of any one drug.
(b) Write a note on 5-HT antagonists.
- 15 (a) What are opioid analgesics? Write the classification with examples.
(b) Write the pharmacological actions, adverse effects and therapeutic uses of paracetamol.
- 16 (a) Classify sedatives and hypnotics with examples.
(b) Write a note on Anti-hyperlipidemic drugs.
- 17 (a) Explain Toxicity studies in detail.
(b) Write about the treatment of myasthenia gravis.
- 18 (a) Write the pharmacological actions of Insulin.
(b) Explain Drug-Drug Interactions with few examples.

FACULTY OF PHARMACY
Pharm. D (6 YDC) II-Year (Main) Examination, July 2017

Subject : Pathophysiology

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part - A and answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Define the terms – Anaplasia and differentiation.
- 2 Write the deficiency symptoms of vitamin B.
- 3 Write a note on chemotaxis.
- 4 How do the free radicals are formed?
- 5 Represent the pathogenesis of Angina pectoris in the form of flow chart.
- 6 Write the clinical manifestations of ulcerative colitis.
- 7 How does wound healing takes place?
- 8 Write the formation of Advanced Glycation End products.
- 9 Write the etiology of parkinsonism.
- 10 What are the effects of smoking?

PART – B (5 x 10 = 50 Marks)

- 11 Write the etiopathogenesis of congestive Heart failure.
- 12 Explain the apoptosis process with a neat labeled diagram.
- 13 (a) Write the etiology of cancer.
(b) Write about the mechanism of Auto immunity.
- 14 (a) Define the term ‘bronchial Asthma’. Write the pathogenesis with a neat labeled diagram.
(b) Represent the pathogenesis of Atherosclerosis with a neat labeled diagram.
- 15 Write in brief about Type III and IV Hypersensitivity reactions.
- 16 (a) Explain the pathogenesis of AIDS.
(b) Write about different types of pneumonia.
- 17 (a) Define the term Hepatitis. Write about the etiopathogenesis.
(b) Write the pathogenesis of TB.
- 18 What are the cellular events of Inflammation? Explain in detail.

FACULTY OF PHARMACY

Pharm D (6 – YDC) II – Year (Main & Backlog) Examination, August 2016

Subject: Pathophysiology**Time: 3 Hours****Max.Marks: 70****Note: Answer all questions from Part – A. Answer any Five questions from Part – B.****PART – A (10x2 = 20 Marks)**

- 1 Distinguish between Mania and Depression.
- 2 Enumerate different types of Angina pectoris.
- 3 Define the terms – Metaplasia and Hyperplasia.
- 4 Write the deficiency symptoms of vitamin C.
- 5 Write the pathophysiology of leprosy.
- 6 Explain the mechanism involved in Autoimmunity.
- 7 Draw a neat labelled diagram of B-Lymphocytes.
- 8 Write the clinical manifestations of Acute Renal Failure.
- 9 Write the biological effects of sulphur dioxide.
- 10 Represent the pathogenesis of peptic ulcer disease in the form of diagram.

PART – B (5x10 = 50 Marks)

- | | |
|--|----|
| 11 Write the etiopathogenesis of AIDS. | 10 |
| 12 a) Describe the structure of MHC (Major histocompatibility complex) with a neat labelled diagram. | 7 |
| b) Write the mechanism involved in transplant rejection. | 3 |
| 13 a) Write the pathogenesis of hypertension. | 6 |
| b) Differentiate between Ischemic and hemorrhagic stroke. | 4 |
| 14 a) Explain the cellular events of inflammation. | 6 |
| b) Write a note on complement system activation. | 4 |
| 15 a) Write in detail about RAS gene and P53 tumour suppressor genes. | 7 |
| b) Explain the etiology of cancer. | 3 |
| 16 Explain in detail about Type II and III Hypersensitivity reactions. | 10 |
| 17 a) Write the pathogenesis of Type I Diabetes Mellitus. | 5 |
| b) How are AGEs (Advanced Glycation End products) formed? | 5 |
| 18 a) Explain different causes of cell injury. | 3 |
| b) Explain in detail the formation of reactive oxygen species. | 7 |

FACULTY OF PHARMACY
Pharm. D II-Year (6 YDC) (Main & Backlog) Examination, August 2016

Subject : Community Pharmacy

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part - A and answer any five questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- 1 Define Health.
- 2 Define OTC medication
- 3 Define Balance Diet
- 4 List various parts of prescription
- 5 Define patient counselling
- 6 Define Idiosyncrasy.
- 7 List out the factors to be considered during selection of appropriate site for community pharmacy.
- 8 Write the importance of coding and stocking.
- 9 Write the objectives of Inventory control.
- 10 Write the causative agents for AIDS and Typhoid.

PART – B (5 x 10 = 50 Marks)

- 11 Write about the causative agents, clinical presentation and prevention of :
 (a) Tuberculosis (b) Leprosy (5+5)
- 12 (a) Explain the role of pharmacists family planning. (7)
 (b) Write about the scope of community pharmacy. (3)
- 13 (a) Explain briefly about various drug interaction with relevant examples. (7)
 (b) Write the legal requirements for the establishment of retail drug store. (3)
- 14 (a) Write the pathophysiology and common drug therapy of pyrexia. (6)
 (b) Mention various types of cholesterol levels usually monitored in lipid profile tests and add note on the interpretation of abnormal values. (4)
- 15 (a) Write a note on the use of computers in community pharmacy. (4)
 (b) Add a note on code of ethics for pharmacist and write about pharmacist in relation to his job and medical profession. (6)
- 16 (a) Define and describe various factors affecting medical adherence? (7)
 (b) Write about screening of B.P. (3)
- 17 (a) Define Rational Drug use (RDU). Explain the role of pharmacist in improving RDU. (7)
 (b) Define Hepatitis with their causative agents. (3)
- 18 (a) Explain various registers used in community pharmacy management. (7)
 (b) Explain : (i) Lead Time (ii) Safety stock (3)

FACULTY OF PHARMACY

Pharm D (6 – YDC) II – Year (Main) Examination, August 2016

Subject: Pharmacology – I

Time: 3 Hours

Max.Marks: 70

Note: Answer all questions from Part – A. Answer any Five questions from Part – B.**PART – A (10x2 = 20 Marks)**

- 1 Write about the Dale's vasomotor response of adrenaline.
- 2 Write the treatment for glaucoma.
- 3 Write the pathophysiological role of histamine.
- 4 Classify beta blockers with examples.
- 5 Write the adverse reactions of insulin.
- 6 Write the mechanism of action of metformin.
- 7 Explain cholinergic receptors in detail.
- 8 Write the actions of estrogens and progestins.
- 9 What is hydantoin syndrome?
- 10 Write the pharmacology of salbutamol.

PART – B (5x10 = 50 Marks)

- | | |
|--|----|
| 11 Classify adrenergic drugs with examples. Write the pharmacology of isoprenaline. | 10 |
| 12 a) Explain biotransformation reactions in detail. | 5 |
| b) How do you prolong a drug action? | 5 |
| 13 a) Write the treatment for bronchial asthma. | 7 |
| b) Write a note on nasal decongestants. | 3 |
| 14 a) Write the pharmacology of serotonin. | 7 |
| b) Write the treatment for migraine. | 3 |
| 15 a) Classify anti-anginal drugs with examples. | 3 |
| b) Write the pharmacology of quinidine. | 7 |
| 16 a) Classify sedatives and hypnotics with examples. Write their mechanism of action in detail. | 6 |
| b) Write the pharmacology of morphine. | 4 |
| 17 a) What are anti-histamines? Classify with examples. | 5 |
| b) Write the pharmacology of diuretics. | 5 |
| 18 a) Write the actions of insulin. | 3 |
| b) Explain the synthesis and regulation of thyroid hormones. | 7 |

FACULTY OF PHARMACY**Pharm. D II-Year (6 YDC) (Main & Backlog) Examination, August 2016****Subject : Pharmacognosy and Phytopharmaceuticals****Time : 3 Hours****Max. Marks: 70****Note: Answer all questions from Part - A and answer any five questions from Part-B.****PART – A (10 x 2 = 20 Marks)**

- 1 Define the terms :
(a) Crude drug (b) Substitutes
- 2 List out different types of vegetative propagation methods with examples.
- 3 Write the biological source, chemical constituents of pyrethrum.
- 4 What are saponins? Give two identification tests.
- 5 With neat diagrams, give the powder characters of quassia.
- 6 Define the terms: (a) Zwitter ion (b) Swelling index
- 7 How do you distinguish Born tragger's and modified born tragger's test?
- 8 Define and classify proteins.
- 9 Write two identification tests for guar gum and sterculia.
- 10 List essential amino acids and write their structures.

PART – B (5 x 10 = 50 Marks)

- 11 (a) Give a brief account on cell inclusions with examples. (5)
(b) List out different systems of classification for crude drugs. Explain in detail pharmacological classification with examples. (5)
- 12 (a) Discuss briefly the flavanoids with examples. (5)
(b) Write about different methods of crop improvement. Explain any one method with examples. (5)
- 13 (a) Define acid value. Explain the principle involved and method to determine it. (5)
(b) Write a note on importance of indole alkaloids with examples. (5)
- 14 (a) What are different processing parameters for the preparation of crude drugs to market. (5)
(b) Write about "lignin and pectin" as cell wall components. (5)
- 15 With a neat labelled diagram write the histological characters for
(i) clove (ii) podophyllum (5+5)
- 16 (a) Explain the structure of protein and list out different methods for its determination and explain any one in detail. (6)
(b) Define drug adulteration. Explain how to prevent it. (4)
- 17 (a) Classify natural fibres. Give the biological sources, chemical constituents and uses of hemp. (5)
(b) Write about purine alkaloids with examples. (5)
- 18 Write the biological source, chemical constituents and uses of : (4+3+3)
(a) Opium (b) Pale catehu (iii) Benzoin

FACULTY OF PHARMACY**Pharm. D II-Year (6 YDC) (Main & Backlog) Examination, August 2016****Subject : Pharmaceutical Microbiology****Time : 3 Hours****Max. Marks: 70****Note: Answer all questions from Part - A and answer any five questions from Part-B.****PART – A (10 x 2 = 20 Marks)**

- 1 What are spirochetes?
- 2 Define Disinfection and Disinfectants.
- 3 What is Mckonkey's Agar media.
- 4 Write about the chemical nature of antigens.
- 5 What do you mean by Booster dose?
- 6 Write about negative staining and its applications.
- 7 What is endo toxin give examples?
- 8 Explain the term phagocytosis with examples.
- 9 Write about Indole test and its importance.
- 10 What is Widal test write its significance?

PART – B (5 x 10 = 50 Marks)

- 11 (a) Describe the history and development of microbiology. (5)
(b) Discuss the importance of microbes in medical microbiology. (5)
- 12 (a) Explain the physical conditions required for the growth of bacteria. (6)
(b) Write a note on cultivation of anaerobic bacteria. (4)
- 13 (a) Describe the general methods of classification for bacteria. (5)
(b) Explain the techniques used in bacterial and viral enumeration. (5)
- 14 (a) Discuss various methods of sterilization for pharmaceutical products. (6)
(b) Discuss in brief validation of sterilization process. (4)
- 15 (a) What are disinfectants? Explain the mode of action of common disinfectants. (5)
(b) Discuss in detail any one popular evaluation test for disinfectants. (5)
- 16 Give a brief account on
(a) blotting techniques. (6)
(b) PCR. (4)
- 17 (a) Write an essay on microbiological assays and discuss in detail the bioparameters controlling the microbiological assays. (6)
(b) Describe the process of standardization of vaccines. (4)
- 18 (a) Explain artificial immunity and how is it different from natural immunity. (5)
(b) Describe the different lab diagnostic tests and treatment for syphilis. (5)

FACULTY OF PHARMACY

Pharm. D II-Year (6 YDC) (Main & Backlog) Examination, August 2016

Subject : Pharmacotherapeutics – I

Time : 3 Hours

Max. Marks: 70

Note: Answer all questions from Part - A and answer any five questions from Part-B.**PART – A (10 x 2 = 20 Marks)**

- 1 Define (a) SV Tachycardia (b) Ventricular Fibrillations
- 2 What is the role of incretins in Diabetes Mellitus?
- 3 Write briefly about rational drug use.
- 4 What are Inflammatory mediators?
- 5 What is Framingham Risk Assessment scale?
- 6 Define Teratogenicity with two examples.
- 7 Define HbA1C, along with the normal value in diabetics and pre diabetics.
- 8 What are the complications of Hormone replacement therapy?
- 9 Categorize Acute Coronary Syndrome.
- 10 Define FEV1 and Tidal volume.

PART – B (5 x 10 = 50 Marks)

- 11 Write a note on Pathophysiology and Pharmacological management of Congestive Heart Failure. (10)
- 12 (a) What is the role of Corticosteroids in treating pulmonary disorders? (5)
(b) Write a note on Viral Conjunctivitis. (5)
- 13 (a) Write a brief note on management of asthma. (5)
(b) Emergency contraception. (5)
- 14 Discuss the etiopathogenesis, risk factors of Hypertension and its management. (10)
- 15 Discuss Pharmacological and non pharmacological management of Dyslipidemia. (10)
- 16 Write notes on:
(a) Prescribing guidelines of Paediatrics (6)
(b) Myxoedema coma (4)
- 17 (a) Write a note on the role of Bisphosphonates in the treatment of osteoporosis along with its administration guidelines. (4)
(b) Write the place in therapy of the various Sulphonyl ureas and DPP4 inhibitors. (6)
- 18 Write in detail about Essential Drug concept. (10)

FACULTY OF PHARMACY

Pharm. D. II – Year (Instant) Examination, January 2014

Subject : Pathophysiology

Time : 3 hours

Max. Marks : 70

Note: Answer all questions from Part-A. Answer any FIVE questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- | | | |
|----|---|---|
| 1 | Define the terms-Necrosis and Metaplasia. | 2 |
| 2 | Write a note on Benign tumors. | 2 |
| 3 | Differentiate Depression and Mania. | 2 |
| 4 | Write a note on Adhesion Molecules in inflammation. | 2 |
| 5 | Write the pathogenesis of Alcoholic Liver Disease. | 2 |
| 6 | Explain different types of Angina pectoris. | 2 |
| 7 | Write the deficiency symptoms of Vitamin C and Vitamin D. | 2 |
| 8 | What are the different biological effects of radiation? | 2 |
| 9 | Write the pathogenesis of chronic bronchitis. | 2 |
| 10 | Write the symptoms of Dysentery. 2 | 2 |

PART – B (5 x 10 = 50 Marks)

- | | | |
|----|---|----|
| 11 | Explain the vascular events of Acute Inflammation. | 10 |
| 12 | a) Explain in detail shock management. | 6 |
| | b) Write a note on chemical mediators of Acute Inflammation. | 4 |
| 13 | a) Explain Immediate (Type-I) Hypersensitivity reaction. | 7 |
| | b) Write about the 'Arthus Reaction'. | 3 |
| 14 | a) Write the Etiopathogenesis of Bronchial Asthma. | 6 |
| | b) Explain different types of stroke. | 4 |
| 15 | a) Explain the Etiopathogenesis of Hypertension. | 6 |
| | b) Write about Hypertrophy in congestive cardiac failure. | 4 |
| 16 | Explain in detail about STDs (Sexually Transmitted Diseases). | 10 |
| 17 | a) Explain in detail about p53 tumor suppressor gene. | 6 |
| | b) Write about the process of Metastasis. | 4 |
| 18 | a) Write the Etiopathogenesis and Symptoms of Tuberculosis. | 6 |
| | b) Write the pathogenesis of Cirrhosis. | 4 |

FACULTY OF PHARMACY

Pharma. D. II Year (Instant) Examination, January 2014

Subject: Community Pharmacy

Time: 3 Hours

Max.Marks: 70

Note: Answer all questions from Part A. Answer any five questions from Part B.**PART – A (10 x 2 = 20 Marks)**

- | | | |
|----|---|---|
| 1 | Define community pharmacy | 2 |
| 2 | Define pharmaceutical care | 2 |
| 3 | Define prescription and write the parts of prescription. | 2 |
| 4 | Write the causative organism for syphilis and gonorrhoea. | 2 |
| 5 | Write the drug therapy to dyspepsia. | 2 |
| 6 | Explain about VED analysis. | 2 |
| 7 | Define OTC medication. Give at least two examples. | 2 |
| 8 | Define safety stock. | 2 |
| 9 | Define health and health promotion. | 2 |
| 10 | Write the composition of balanced diet. | 2 |

PART – B (50 Marks)

- | | | |
|----|---|----|
| 11 | Write the role and responsibilities of community pharmacist. | 10 |
| 12 | Differentiate the terms administration and management and organization with their role in community pharmacy. | 10 |
| 13 | Define inventory control. Explain in detail about EOQ Method. | 10 |
| 14 | Define medication adherence. Explain the role of pharmacist in improving the adherence. | 10 |
| 15 | Explain the etiology, clinical presentations and prevention of | |
| | (a) AIDS | 5 |
| | (b) Malaria | 5 |
| 16 | Write the role of pharmacist in family planning. | 10 |
| 17 | Write in detail about care of geriatric patients. | 10 |
| 18 | Write the pathophysiology and drug therapy of the following: | |
| | (a) Pain | 5 |
| | (b) Constipation. | 5 |

FACULTY OF PHARMACY

Pharma. D. II Year (Instant) Examination, January 2014

Subject: Pharmacology – I

Time: 3 Hours

Max.Marks: 70

Note: Answer all questions from Part A. Answer any five questions from Part B.**PART – A (10 x 2 = 20 Marks)**

- | | | |
|----|---|---|
| 1 | Define the terms tachyphylaxis and teratogenicity. | 2 |
| 2 | What is vasomotor reversal of Dale? | 2 |
| 3 | Give a note on insulin analogues. | 2 |
| 4 | What is triple response? | 2 |
| 5 | Write about the role of prostaglandins on kidney. | 2 |
| 6 | Give the differences between local anaesthetics and general anaesthetics. | 2 |
| 7 | What are Non-steroidal anti inflammatory agents? Classify them. | 2 |
| 8 | Write a note on Platelet activating factor. | 2 |
| 9 | Define Epilepsy and write the mechanism of action of phenytoin. | 2 |
| 10 | Explain about cholinesterases. | 2 |

PART – B (50 Marks)

- | | | |
|----|---|---|
| 11 | (a) Write in detail about factors modifying drug action. | 7 |
| | (b) Write a note on biotransformation reactions. | 3 |
| 12 | (a) What is congestive heart failure? Write in brief about drugs used in the treatment of congestive heart failure. | 7 |
| | (b) Classify hypolipidemic agents. Write a note on statins with examples. | 3 |
| 13 | (a) Give the pharmacology of adrenaline. | 7 |
| | (b) Write a note on mydriatics and miotics. Give examples. | 3 |
| 14 | (a) Write a note on 5-HT antagonists with examples. | 5 |
| | (b) Give a detailed note on pharmacological actions of histamine. | 5 |
| 15 | (a) What are hypoglycaemics? Classify oral hypoglycaemics and write in detail about them. | 6 |
| | (b) Enumerate the actions of insulin. | 4 |
| 16 | Write notes on | |
| | (a) Central nervous system stimulants. | 5 |
| | (b) Pharmacological actions of Levodopa. | 5 |
| 17 | (a) Define and classify bronchodilators. | 3 |
| | (b) Explain in detail any two classes of bronchodilators. | 7 |
| 18 | Write short notes on: | |
| | (a) Drug Interactions | 5 |
| | (b) Anti thyroid drugs | 5 |

FACULTY OF PHARMACY**Pharma. D. II Year (Instant) Examination, January 2014****Subject: Pharmacognosy and Phytopharmaceuticals****Time: 3 Hours****Max.Marks: 70****Note: Answer all questions from Part A. Answer any five questions from Part B.****PART – A (2 x 10 = 20 Marks)**

- 1 Explain the terms:
(a) Secondary metabolite (b) Rancidity
- 2 What is Enfleurage? Write about it.
- 3 Draw a neat labelled diagram of plant cell.
- 4 Explain (a) Gunmosis (b) Rolled Towel test.
- 5 Define 'Glycosides'. Classify with examples.
- 6 Diagrammatically explain powder characters of fennel.
- 7 How does starch differ from cellulose?
- 8 Write any two identification tests for alkaloids.
- 9 Write about and functions of proteins.
- 10 Define 'Lipid'.

PART – B (50 Marks)

- 11 (a) Write a note on structural composition of plant cell wall 5
(b) Write about morphological classification of crude drugs with examples. 5
- 12 (a) Write histological characters of (i) Digitalis (ii) Cinnamon. 6
(b) What are (i) Liebermann Buchard test (ii) Borntrager's test. 4
- 13 (a) Write various merits of obtaining drugs from cultivated plants. 5
(b) What are the various benefits of using natural pesticides. Write about Pyrethrum and Nicotine. 5
- 14 Write important pharmacognostic details of ISAPGOL & TRAGACANTH. 10
- 15 (a) Write various qualitative tests for amino acids and proteins. 5
(b) Discuss procedure for determination of primary structure for protein. 5
- 16 (a) Write ideal conditions for storage of crude drugs. 4
(b) Write a note on drug adulteration. 6
- 17 (a) Write a note on plant growth stimulators. 4
(b) Define iodine value and saponification value. Write procedure for determination of iodine value. 6
- 18 (a) Write in detail extraction method for Olive Oil. 5
(b) Write about any two methods for estimation of proteins. 5

FACULTY OF PHARMACY

Pharm. D. II – Year (Instant) Examination, January 2014

Subject : Pharmaceutical Microbiology

Time : 3 hours

Max. Marks : 70

Note: Answer all questions from Part-A. Answer any FIVE questions from Part-B.

PART – A (10 x 2 = 20 Marks)

Write about

- | | | |
|----|---|---|
| 1 | Relationship between Aquatic and Medical Microbiology | 2 |
| 2 | Bacteriophages | 2 |
| 3 | Autotrophs and Heterotrophs | 2 |
| 4 | Spore staining | 2 |
| 5 | Membrane Filters | 2 |
| 6 | Definition of immunity | 2 |
| 7 | Definition of Antiseptic | 2 |
| 8 | PCR Widal | 2 |
| 9 | Definition of Vaccines | 2 |
| 10 | T.B. Vaccine | 2 |

PART – B (5 x 10 = 50 Marks)

- | | | |
|----|---|---|
| 11 | a) Write about the Historic developments of Microbiology. | 5 |
| | b) Discuss the Major Divisions of Microbiology. | 5 |
| 12 | a) Discuss general characteristics of Fungi. | 5 |
| | b) Discuss about general properties of bacteria. | 5 |
| 13 | a) Describe Cultivation of Virus. | 5 |
| | b) What are the nutritional requirements of bacteria? | 5 |
| 14 | a) Describe the different staining methods of bacteria. | 5 |
| | b) Discuss the chemical methods of sterilization. | 5 |
| 15 | a) Discuss classification of Immunity. | 7 |
| | b) Discuss about fungicidal agents. | 3 |
| 16 | a) Describe the Microbiological Assay of Streptomycin. | 6 |
| | b) Describe standardization of Vaccines. | 4 |
| 17 | a) Discuss cultivation, pathology and diagnosis (Lab) of typhoid causing bacteria | 5 |
| | b) Discuss cultivation, pathogenicity, lab diagnosis of cholera bacteria. | 5 |
| 18 | a) Discuss about toxoids and their significance | 5 |
| | b) Discuss about the Immunization programme | 5 |

FACULTY OF PHARMACY

Pharm D. II – Year (Instant) Examination, January 2014

Subject : Pharmacotherapeutics – I

Time : 3 hours

Max. Marks : 70

Note: Answer all questions from Part-A. Answer any FIVE questions from Part-B.

PART – A (10 x 2 = 20 Marks)

- | | | |
|----|---|---|
| 1 | Define Rational Drug use. | 2 |
| 2 | Write about diagnosis and treatment for Gestational Diabetes mellitus. | 2 |
| 3 | Write about drug induced pulmonary diseases. | 2 |
| 4 | Explain the applications of hormone replacement therapy. | 2 |
| 5 | Define and write the causes of unstable angina. | 2 |
| 6 | What is Corpulmonale and write the causes for it? | 2 |
| 7 | What is meant by diabetic coma? | 2 |
| 8 | Write briefly about the pharmacokinetic changes that occur in a pregnant woman. | 2 |
| 9 | Write a short note on Essential drug concept. | 2 |
| 10 | Write the role of β -Blockers in the treatment of glaucoma. | 2 |

PART – B (5 x 10 = 50 Marks)

- | | | |
|----|---|-----|
| 11 | a) Describe the pathophysiology of myocardial infarction.
b) Explain the ECG changes in Arrhythmias. | 7+3 |
| 12 | a) Explain the management of hypothyroidism.
b) Explain the treatment for diffuse toxic goiter. | 7+3 |
